DEALSENSE AI — THE END-TO-END AGENTIC SALES CO-PILOT

AI that prepares you before, assists you during, and documents after — so sellers sell, not type.

BEFORE THE CALL

Pre-Call Prep Agent

- Autonomously gathers similar won deals & credible references
- Generates tailored talking points & anticipates questions
- Seller walks in fully briefed in seconds, not hours

HACKATHON ALIGNMENT:

Agentic AI — autonomous multi-tool orchestration, not just a chatbot

DURING THE CALL

Live RAG Assistant

- Real-time push-to-talk (Shift+Space) for instant answers
- Sourced answers in <5 seconds from KB + live context
- WebSocket-powered live transcription integration

HACKATHON ALIGNMENT:

RAG + Real-time GenAI integration solving a live business problem

AFTER THE CALL

Follow-Up Orchestration

- Auto-generates MoM & extracts action items with deadlines
- Checks BANT qualification gaps & scores deal health (1-10)
- Writes back to SharePoint via Graph API upon approval

HACKATHON ALIGNMENT:

Agentic AI — coordinates 5 sub-tasks, self-validates, produces auditable output

60-70% Reduction in seller admin time

+40% Improvement in follow-up completion

HOW WE BUILT IT — INNOVATION THAT MAPS TO THE JUDGING CRITERIA

01 AGENTIC AI ARCHITECTURE

TECHNICAL INNOVATION

PERCEPTION → PLANNING → TOOL EXECUTION → REFLECTION → ACTION

- **3 Purpose-Built Agents:** Pre-Call Prep, Risk Detection, Follow-Up Orchestration working in concert.
- **Autonomous Reasoning:** Agents plan their own tool calls and self-validate outputs (not just prompt chaining).
- **Full Traceability:** Every agent response includes a full execution trace for debugging.

02 HYBRID RAG PIPELINE

GENAI INTEGRATION

Vector DB (FAISS) → Gate (L2 < 1.8) → Web Search → LLM

- **Confidence-Gated Fallback:** Automatically switches from RAG to Web Search based on vector distance scores.
- **Source Tagging:** Every answer tagged (RAG | WEB | LLM) so sellers trust the data.
- **Live-Call Context:** Queries combine real-time transcript + knowledge base.

03 RESPONSIBLE AI BY DESIGN

RESPONSIBLE AI

PII Shield + Human-in-Loop + Audit Logs

- **PII Tokenization:** Regex detection + AES encryption ensures PII never reaches the LLM.
- **Human-in-the-Loop:** No autonomous emails or CRM updates without explicit seller approval.

04 PRODUCTION OBSERVABILITY

SCALABILITY

Opik Integration → Hallucination Check → Latency Tracking

- **Continuous Evaluation:** Automated pipelines track answer relevance and confidence across model versions.
- **Latency Monitoring:** Per-phase timing analysis ensures real-time performance (<5s target).

FROM PROTOTYPE TO PLATFORM — BUILT FOR DXC AT SCALE

THE MARKET OPPORTUNITY

\$2 Trillion in AI-driven enterprise spend by 2027

SELLER ADMIN

60-70%

Reduction
Saves 5-7 hrs/week. AI handles prep, docs & follow-ups.

FOLLOW-UPS

+40%

Completion
Auto-extracted action items with owners & deadlines.

DEAL VELOCITY

10-15%

Faster Cycles
Real-time risk detection catches stalls early.

MOM ACCURACY

>90%

Capture Rate
LLM extraction vs. manual note-taking errors.

REVENUE MULTIPLIER EFFECT

100 DXC Sellers 6 Hrs/Week 15 FTE Equivalent

AZURE-NATIVE SCALABILITY

- Serverless Ingestion:** Azure Functions + Container Apps for PII chunking.
- Vector Search:** FAISS (Prototype) → Azure AI Search (Production).
- LLM Orchestration:** Azure OpenAI Service (GPT-4o) with content filtering.
- Workflow Integration:** Microsoft 365 Graph API (SharePoint/Outlook).
- IaC:** Terraform for repeatable multi-region/tenant deployment.

RESPONSIBLE AI AT SCALE

- PII Tokenization:** Regex + Luhn validation ensures compliance across geos.
- Human-in-the-Loop:** No autonomous writes without seller approval.
- Enterprise Security:** RBAC + Comprehensive Audit Logging.
